ASHLEY CUCUMBER is a new mildew resistant slicing variety which shows promise of becoming a standard in the industry.

Please note

VINESEEDS are ranked by Plant Breeders everywhere as among the most difficult of all vegetables in which to maintain genetical purity. They present problems of breeding, production and processing to the seedsmen that are not common with most vegetable species. As America's only firm specializing solely and without sidelines in VINESEEDS, we are especially proud of the close, intimate control we are able daily to exercise in the production of our Specialist Breeder's Stocks. We offer them to the Wholesale Trade with every feeling of confidence, but necessarily subject to the following:

Warranty

Subject to the limitation of liability herein set forth, we warrant that the seeds are as described on the container, within tolerances recognized in the vegetable seed production industry. We give no other or further warranty express or implied. In no event shall we be liable for any loss due to the failure, impairment or quality thereof or variety variance therein, whether on warranty or for negligence or otherwise in any amount exceeding the purchase price of the seeds sold. The Buyer's exclusive remedy in all cases shall be recovery of not to exceed the amount of such purchase price.
